Keystone Gorge Loop Trail

This ~1.8 mile loop is located off the Galloping Goose trail system between Lawson Hill and Two Rivers. The conservation easement for this trail was dedicated to San Miguel County from The Nature Conservancy in 2009. The Keystone Gorge Trail follows the San Miguel River through the gorge and is connected by 2 newly built bridges. The lower suspension bridge is an impressively engineered structure that you need to see for yourself. This is a single track hiking trail only. No dogs or mountain bikes allowed!
