The 0.39 mi Galloping Goose connector is a critical link between the Society Turn underpass and the Galloping Goose regional trail. With the completion of this short trail, users can travel the 21 miles from the Town of Telluride to Lizard Head pass entirely off highway. Dogs on a leash are permitted, if accessing the Remine Creek Trail. Otherwise, dogs are not permitted on the section of this trail that connects with the Galloping Goose Trail. The reason there are no dogs permitted is because this is a preserved area for wildlife habitat and holds conservation values. Thanks for respecting the rules!
